About Us

Who are we?

Vision One Technologies provides excellence in the AV/T (Audio, Visual, Information Technology) industry. We're geared to service Melbourne's schools, businesses, builders, architects, interior designers and creative-tech dreamers. Established in 1998, we're over 24 years strong and pride ourselves on a passion for people and technology. Providing audio, visual and information technologies, Vision One offers an expansive range of integrated solutions, tailor-made to fit every individual project. From classroom interactive projection and touch screens to LED signage, video walls, floor projection and creative custom AV content, we've got a solution for every application.

Vision One offers peace of mind.

- We meet manufacturer standards from sales to service in order to receive authorised status.
- We receive training directly from manufacturer representatives and share that expertise with you.
- We provide service and support for all the products we sell.
- We ensure that the manufacturer warranties will be honoured.
- We offer the most comprehensive after-sales support and maintenance services in the industry.

Marketplace leaders in technology supply and integrated solution design

We take pride in providing schools and businesses with solutions that will more than adequately meet their expectations and requirements. And although our products & services can be sourced from a number of companies out in the market place, our attention to customer service excellence and ongoing support can rarely be matched. We're extensively committed to the research and implementation of emerging technologies, ensuring that our customers are at the forefront of the technology universe.

Just some of our clients include:

- We provide integrated technology solutions
- Melbourne's premier AV/T technology integrator
- School, business and government supply
- Authorised distributor of premium products
- Our technology experts constantly support you
- We're always available via phone and email

VISION ONE ® Technologies

VISION ONE® Technologies

We're driven to deliver you outstanding products, services & technology solutions. We excel in the areas of audio, visual, information technology & customer support.

We understand that in today's ever-changing workspace, each environment provides unique and individual challenges and requires a personalised solution. Our vast range of expertise provides the scope to deliver an "all-stop-shop" solution, covering all your technology needs at a single point of call.

We take great pride in our ability to build relationships, and not merely just sell products. So give us a call, prepare the coffee machine and let's talk about how we can transform the technology at your school or business today!

Emergency Services (ESTA)
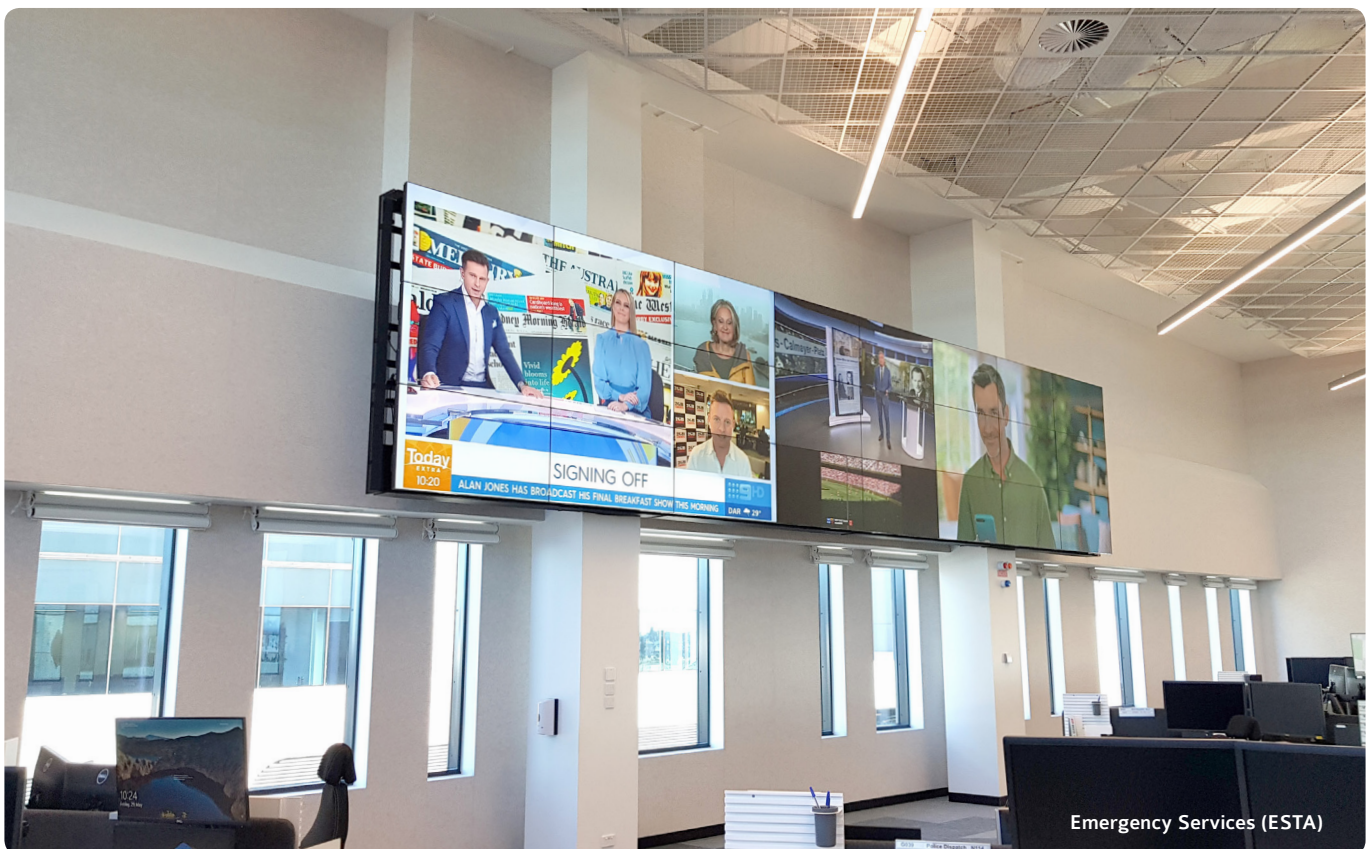

Every project requires a vision.

Our Vision:

" At Vision One, our ultimate goal is to earn the respect of our customers by offering an honest approach to sales and a genuine interest in servicing their real needs.

A total commitment and dedication to satisfying customer demands will be the underlying motivation toward establishing Vision One as a company that has a reputation of reliability, dependability and an approach to service that is second to none. "

The Petal Room

Bigger Pictures with Video Wall Display Solutions

What is it?
A video wall is any large electronic display of an image or images being displayed in a presentation format.

How does it work?
Typically, multiple display devices are tiled together as close as possible in a matrix to create a single logical screen. Then, with video processors, an image is scaled across the screen or multiple images are spread out over the logical screen to deliver a single or multiple display.

How many screens can I use?
As many as you like! 2x2, 3x3, 4x4, 5x5 - as long as you can count, we can do it!

- Common configurations inc. 2x2 and 3x3
- Brands inc. LG, NEC, Philips and Samsung
- Perspex cover protection for in-gym installs

Portfolio Snapshot

VISION ONE®
Technologies

We've unlocked the hidden components of creativity, function and wonder in audio visual technology. Our portfolio isn't just a series of case studies. It's a "Technology Bible."

We're proud of the work we get to call "ours." Whether it's LED video walls, digital signage, custom-built control systems, projection, interactive touch screens and more, we like to "show off" and share what we've been up to. You can find a complete list of our works portfolio by visiting the following link: https://www.visionone.com.au/projects-portfolio/. Alternatively, ask us for a copy of our "AV Showcase" - a document containing some of our latest and greatest technology creations. Below, we've featured just a small handful of our super-awesome audio visual outcomes.

Ave Maria College

Custom Control Systems

Our Capabilities:

"We pride ourselves on being able to deliver custom-built, tailor-made solutions in-house. While we partner with tech-heads and gizmo-conquerors on a day-to-day basis, we like to control the creative internally. That's why, with Vision One, we build both hardware and software outcomes that are completely unique and brand-conforming. We do it all: from custom touch screen control systems and YouTube videos to edge-blended projection and digital signage content. Achieve your technology dreams with us today."

Beaumaris Secondary College

# Creating Interactive Teaching and Learning Spaces

What is it?
An interactive touch screen is a unique screen technology that allows you to interact or touch, manipulating the content displayed.

Why do I need one?
Interactivity is apart of our day-to-day world. Whether you're using a tablet or a mobile device, transferring this functional element of human engagement to the classroom is essential for bridging the gap between practical learning and behaviour.

How big can I go?
Would you be excited if we told you we could go as big as 98"? We can make virtually any surface interactive.
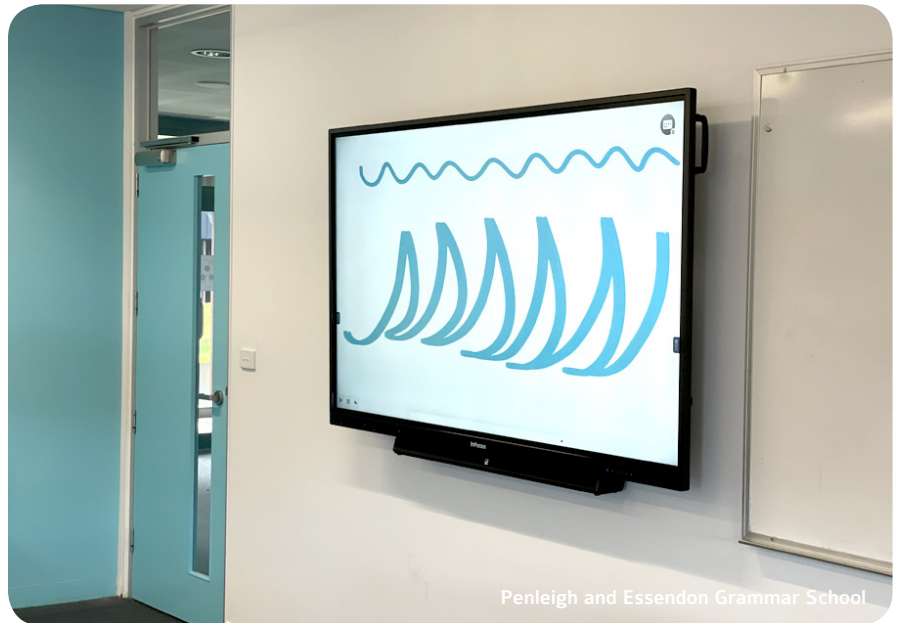

Penleigh and Essendon Grammar School

- Wireless interactivity available
- Non-touch display screens available
- Cleaning solutions to combat COVID-19 available

Digital Menu Boards in Retail and Hospitality

San Churro, Highpoint

What is it?
A digital menu board is your opportunity to bring the menu to life. It goes beyond listing the items available for choosing — it includes enticing graphics, edutaining videos, lists specials, and everything else you want your customers to know.

Why do I need one?
Restaurants without digital menus have a line item on their budgets that restaurants with digital menus don't have. After investing in digital signage, you no longer have to send regular promotions and menu changes to your printers. Your front-line staff won't be responsible for replacing old poster boards. Simply, save on hard costs and involve fewer people.
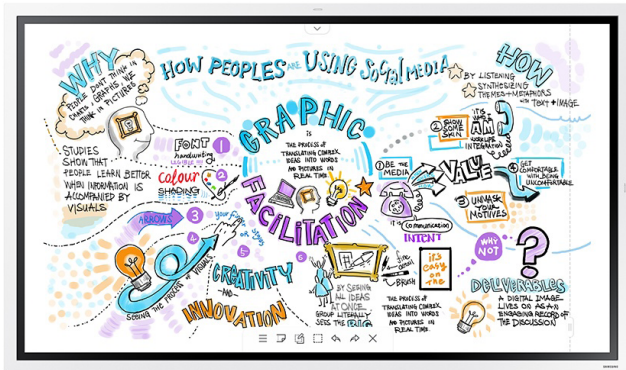

- Horizontal, "wall-formal" and single display options
- Street-facing signage solutions
- Creative and unique outcomes

Edge Blending & Multi-Projection Warping Technology

A New Age Technique
Edge blending is a technique used to describe the process of visually combining several projected images to make a single seamless image.

What's it for?
Typically, this is done to increase the size of a projected image to make a very wide image, or by combining a number of lower resolution devices together to increase the total resolution of a display.
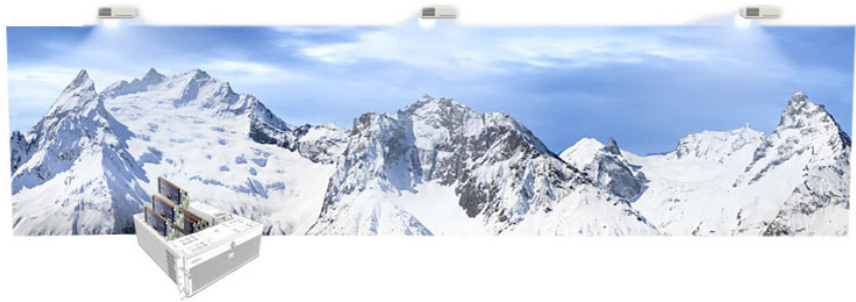

How is it done?
a number of projectors are needed which are firstly overlapped and then visually joined together using an edge blending technique.

- Create total blended interactive surfaces
- Blend a minimum of 2 projectors together
- Get creative - blend in different design styles

Vision Report

ENQUIRE FOR PRICING
★ ★ ★ ★ ★

Floor Projection Technology & Software

What is it?
LumoPlay® interactive floor projection technology turns any wall or floor surface into a motion-powered interactive play area.

How do we do it?
By utilising a high brightness 360° vertical tilt angle projector, a webcam, a laptop/computer/hard drive, we use a special software to map and project a motion-powered interactive surface.

Where's it used?
This kind of solution is commonly used in play areas, corporate entrances, advertising walls with heavy foot-traffic and shopping centres and plazas.
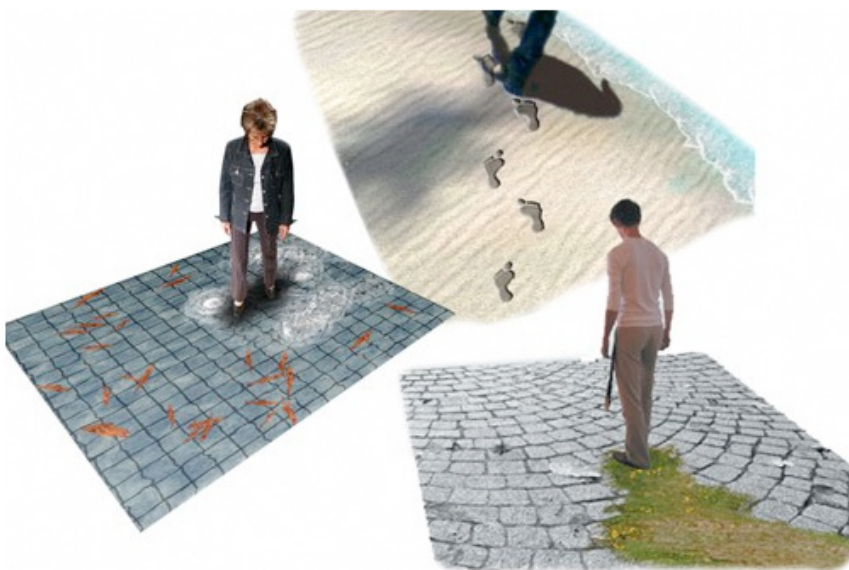

- Create playlists of any number of scenes
- Create engagement with students and clients
- Get creative - customise in different design styles

Combined Builders Network

Vision One can take your technology installation from concept to completion.

Professional and creative solutions
We have a professional and creative team of highly qualified and capable technicians who will inspect your environment and advise you of the best possible audio, visual and information technology solutions package to suit your requirements.

We've got you covered for any challenge
Whether it's for a theatre, school hall, classroom, your boardroom or the home, we will consult with you to create and design a package ranging from the most basic of requirements to a fully automated audio visual environment, where the press of a button will transform your room to create an incredible experience of sight and sound.

Why choose Vision One?
When you are choosing a supplier for your AV/IT installations and/or solutions, you want to make the choice that provides the best, most reliable value for money experience. Vision One has been delivering professional installations and integrated solutions since 1998. We've listened to our customers along the way and tailored our services accordingly.

Why install?

- Increased security - installed equipment is far less likely to 'go missing' than a stand alone unit.
- Ease of use - the projector is always correctly set up, with all the accessories (no more missing adaptors or forgotten cables)
- Reduced preparation time - simply turn up, insert your disc, Blu-ray, USB or connect your device and present.
- Health and Safety - cables and leads are tidily installed out of harm's way.
- Greater impact - a permanent installation increases the professional 'look and feel' of your whole presentation.
- Consistency - distances from the screen and projector angles are fixed in the optimum position (particularly important for interactive whiteboards)
- Prolonged equipment life - less handling reduces general wear and tear and increases lamp life.

Biamp Devio Room Dock

PC Locs Carrier 40 Cart

Crestron Room Booking System

Collaboration Tool for the Modern Classroom and Work Place

Devio comes packed with conferencing technology, doing all the work so you don't have to.

Quick Benefits

- Uses standard Windows and Mac OS X audio drivers.
- USB 3.0 allows a customer to plug into his or her laptop to use in-room technology.
- 8-element microphone provides 360 degrees of coverage.
- Acoustic echo cancellation removes unwanted noise.
- Offers simple pass-through HDMI connectivity.

Tablet and Laptop Charge Station

The Carrier 40 Cart – Chromebook Cart takes device management to the next level... a complete system that offers more flexibility than any other Cart in its category.

Store & Charge

- Charges 40 devices simultaneously.
- ECO Safe Charge™ handles the power requirements of almost any device.
- Includes eight 5-slot Carry Baskets.
- Easily set your Cart to charge for a specified time.
- Features a three-point locking system to keep your valuable devices safe.
- Three level adjusting storage shelf.
- Lifetime warranty and free shipping.

Room Booking Made Easy

A stylish and versatile wall mount touch screen designed specifically to run the Microsoft Teams® Panels scheduling application via simple web-based configuration.

Native MS Teams Platform

- The native Microsoft Teams Panels scheduling application helps to maximize productivity and manage usage for meeting spaces via Microsoft Teams.
- The touch screen can be configured to use the Microsoft Teams scheduling calendar, allowing users to book meetings through their Microsoft Teams account.
- Fix the display to drywall, masonry, glass, mullions, and other surfaces.

Column Speakers

The KYRA12 design column speaker consists of 12 x 2" high-quality aluminum cone full-range drivers, delivering extraordinary clarity and detailed sound.

Audac Touch 2, 2-Way ARES5A, VEXO Loudspeakers

• Using the freely available Audac Touch 2 software, application specific dashboards can be created and customized, allowing the control of multiple devices from one single application.

• The ARES5A is a 2-way active speaker system consisting of an active and passive unit to be linked with each other. Its craftmanship in combination with an integrated DSP is creating an extremely clear and powerful sound experience for a wide range of applications.

• The VEXO series are compact high performance 2-way loudspeakers and come in 3 different models, each of them with different sizes and performances meeting the requirements of every application.

Wireless Audio & Sound Masking

ListenWiFi is the pro audio streaming solution ideal for multi-screen, video wall, or multi-video image applications. With Listen's Wi-Fi Personal Listening system, users can listen to any signal using their own iPhone or Android device.

The Qt Privacy Sound Masking System is a cost-effective solution to protect student and teacher conversations. Direct-field sound masking technology adds a low-level background sound inside open plan learning classrooms, waiting rooms or exam rooms.

- PentaClass, Juno & ListenPoint options available
- Three tier options for ListenPoint & Juno
- Connect via Bluetooth technology

COVER FOR CABLE/PLATE FAULTS

EDUCATION AND TRAINING

Vision One Australia provide every level of audio visual AV maintenance, and AV technical support, with fast response times, preventative maintenance, online fault reporting and annual reviews.

Anyone who has experienced technical failures, either just before or during a presentation to clients or an important staff meeting will understand the need for the audio visual system to be properly maintained, with competent technical support personnel.

Vision One provide three different levels of AV maintenance contracts (Standard, Standard Plus, & Unlimited Premium) with varying degrees of cover and price, depending upon the importance of the cover and need to have the system operational as fast as possible. Standard contracts are available in one-year or two-year terms.

Some key advantages are:

- Where the audiovisual system is existing, and has not been designed and installed by Vision One, we will complete an audit of the system to identify all of the components that make up the system.
- Each contract will have a maximum call-out response time. Thus, providing you peace of mind that you will receive technical assistance on-site within a predetermined time limit.
- If you have contracted Vision One to design and install your audiovisual systems, you will already benefit from an inherently reliable design. Our philosophy is to always engineer solutions with integrity and therefore adopt principles to increase reliability.
- As part of our maintenance cover we provide telephone support. You will be able to speak to a qualified engineer, system designer or programmer to discuss the issue at hand.
- At predetermined times, we shall attend site to carry out a full check of the audiovisual systems. Each Vision One contract carries a detailed technical breakdown of exactly what work will be undertaken at each preventive maintenance visit.
- All clients with our audio visual maintenance cover receive a log-in on this site that enables them to report a fault 24 hours a day, seven days a week and 365 days a year.
- If a client is covered by a Vision One audio visual maintenance contract, they receive the added benefit of substantially reduced labour rates for additional services that relate specifically to the covered equipment.
- We can build into our audio visual maintenance contracts, ongoing 'on-site' training & education for clients who don't have their own in-house support staff.

- System audits and health checks
- Preventative maintenance
- Web and phone support
